PROFESSIONAL SUMMARY

Computer Science and Engineering student with a strong academic background and a passion for software development, problem-solving, and continuous learning. Eager to apply technical knowledge, adapt to new technologies, and contribute effectively in a collaborative work environment.

EDUCATION

B.E. Computer Science & Engineering | BIET, Davanagere | 2023 – 2027 | CGPA: 9.3
PUC (Science) | Sri Siddaganga PU College, Davanagere | 2021 – 2023 | 94.33%
SSLC | S.H.S.S School, Harihara | 2020 – 2021 | 96.16%

SKILLS

Technical: Languages-Java, C, Python, JavaScript, SQL | Web Technologies & Tools-HTML, CSS, Bootstrap, PHP, Streamlit, VS Code, Git, GitHub, XAMPP, MySQL | Core-Operating Systems, Computer Networks, OOP, DBMS, ADA, DSA | AIML- LangChain, FAISS, Groq LLM, Stable Diffusion, GPT-2, REST APIs

Soft skills: Good Communication | Time management| Team player |Problem Solving

Languages: Kannada (Native), English (Professional), Hindi (Basic)

INTERSHIPS (Online) & TRAINING

Completed a 1-month online **Generative AI** Internship at Prodigy InfoTech, gaining hands-on experience in Markov Chains, GPT fine-tuning, Stable Diffusion, and Neural Style Transfer.

Accomplished a 3-month **Web Development** Internship at Placemantra (Apr-June 2025), where I built and deployed 3+ responsive frontend web projects using HTML, CSS, JavaScript, and Bootstrap.

Currently working on **AI/ML** and **Deep Learning** foundational tasks under a 3-month (April-present) internship program associated with AICTE. Exploring practical machine learning workflows and building skill-based projects to strengthen understanding of real-world AI applications.

PROJECTS

Personal Budget & Expense Tracker-Mini project focusing on DBMS: Developed a basic web application to record and manage personal expenses and budgets. Implemented core functionalities using HTML, CSS, PHP and MySQL, focusing on database connectivity, form handling, and simple backend logic for storing and data retrieval.

AI-Powered Goal-Oriented Virtual Study Assistant- Mini Project
Developed an AI-based study assistant using Python, Streamlit, LangChain, FAISS, and Groq LLM to help users create personalized study plans, generate quizzes, and track learning progress. Executed RAG-based learning support using uploaded study materials and vector search.

Global Debt Settlement Optimizer
Designed a financial settlement system in C using greedy algorithms and data structures to minimize transactions between participants. Enforced multi-currency support, transaction fee handling, and optimized creditor-debtor settlement logic.

HOBBIES & INTERESTS

Solving Problems on HackerRank and LeetCode | Sketching and Painting | Indoor games | Cycling | Listening to podcasts.

CERTIFICATES & ACHIEVEMENTS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
MongoDB Basics for Students -MongoDB
Java, Python and Cloud fundamentals certification – Infosys Springboard
Participated in Smart India Hackathon (SIH), EY Hackathon, and Generative AI-focused hackathons
Attended Computer Networks Bootcamp and Generative AI Workshop
